

NAIM ABDULAZEEZ

Frontend Web Developer

abdulazeeznaim@gmail.com | 0811 154 4592 | Lagos Island, Nigeria | github.com/CyberGod6241 |

PROFESSIONAL SUMMARY

Frontend Web Developer with 3+ years of experience building responsive, production-grade interfaces with React, Tailwind CSS, and Firebase. Track record of shipping full-stack products end-to-end as a solo/freelance developer, from UI to Firestore data modeling and Cloud Function integrations. Currently expanding into cybersecurity (1+ year), with hands-on focus on secure auth flows, payment webhook verification, and Firestore security rules — bringing a security-conscious mindset to frontend work.

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, Responsive/UI Design

Backend & Cloud: Firebase Auth, Firestore, Cloud Functions, REST API Integration, Node.js

Security: Web Security Practices, Secure Auth Flows, Payment Webhook Verification, Firestore Security Rules, Rate Limiting, OWASP Fundamentals

Tools & Practices: Git & GitHub, CI/CD, Docker, Linux, Agile/Scrum, Code Debugging & Troubleshooting

EXPERIENCE

Frontend Web Developer — Self-Employed / Freelance

Jan 2022 – Present

Lagos, Nigeria

- Designed and built responsive, production-ready web interfaces using React, Tailwind CSS, and Vite for multiple independent client and personal products.
- Architected and shipped a Nigerian food-ordering platform (Kumchop) end-to-end, including a customer app with quantity-based pricing, cart, and delivery/pickup flows, and an admin panel refactored into 13 modular components for orders, menu, and analytics.
- Built a WhatsApp-based contact exchange platform (StatusPool) integrating Paystack payments, with server-side webhook verification via Cloud Functions and Firestore security rules to protect user and transaction data.
- Translated UI/UX wireframes into interactive, pixel-accurate web elements, collaborating directly with design requirements to deliver polished user experiences.
- Replaced mock data with live Firebase/Firestore integrations, implemented authentication flows, and enabled real-time order status updates for end users.
- Maintained clean Git workflows with meaningful commits and branching, and debugged/troubleshoot issues across the stack to keep applications stable in production.

SELECTED PROJECTS

Kumchop — Full-Stack Food Ordering App *React, Tailwind, Firebase*

- Customer app with category filters, cart slide-over, and form validation; admin dashboard with a single integration point for order-status updates.

StatusPool — WhatsApp Contact-Exchange Platform *React, Vite, Tailwind, Firebase, Paystack*

- Built for Nigerian Status-based businesses; implemented Firebase Auth, Firestore security rules, and rate limiting alongside secure payment verification.

Daily Tracker — Productivity Web App *React, Tailwind, Firebase*

- Designed and built the landing and login experience with a clean, conversion-focused UI.

EDUCATION

B.Sc. Computer Science — Adekunle Ajasin University

2023 – Present

Akungba-Akoko, Ondo State, Nigeria
